

Ken Tech

We are a recognized provider of custom solutions across various verticals, specializing in the online entertainment industry with focus on sports.

We offer turnkey computing solutions, systems support, web development and web-based applications, customized for the specific market needs and demands. Our software solutions gear our partners to gain mileage ahead of their rivals. KenTech's mission is to build cutting-edge applications, which deliver long term commercial benefits and make technology an asset for our clients' business. Our team of trailblazers, innovators, problem solvers and creative minds is seeking an iOS Developer.

iOS Developer

We are looking for a qualified iOS developer to join our team. You will be responsible for the development, testing, and implementation of innovative customer-facing mobile applications for iOS devices, while working in a fast-paced environment. Ultimately, you will have a drive for pushing mobile technologies to the limits and will work with our talented team to design and build the next generation of our mobile applications.

If you are passionate about mobile platforms and translating code into user-friendly apps, we would like to meet you.

Duties and Responsibilities

- Support the entire application lifecycle (concept, design, test, release and support)
- Produce fully functional mobile applications, writing clean code using Agile methodology
- Unit-test code for robustness, including edge cases, usability, and general reliability
- Troubleshoot and debug to optimize performance
- Design and build interfaces and advanced applications for the iOS platform to improve user experience
- Ensure new and legacy applications meet quality standards
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency.

Knowledge and experience

- Demonstrated knowledge of major frameworks (Cocoa Touch, Core Services and/or Core OS)
- Three to five years hands-on experience in modern Native iOS development environments (Swift/Xcode/Objective-C) developing software Applications.
- Expert understanding of OOP design principles
- Experience with enterprise level, high-availability mobile application development required
- Strong application performance/tuning skills
- Experience with developing mobile applications that interface with RESTful services
- Experience with third-party libraries and APIs
- Strong understanding of caching as it relates to mobile devices and application performance
- Understanding of PCI DSS, PII and mobile application security
- Solid understanding of the full mobile development life cycle
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies, (ReactNative is a plus)
- Experience with developing applications that run on multiple mobile devices with different form factors
- Data structures, algorithms, and software design optimized for mobile platform
- Coding practices, including: design documentation, unit testing, source control (GIT, SVN), and peer code-reviews
- Strong knowledge of unit testing, behavioral testing and continuous integration
- Strong application performance/tuning skills
- Excellent analytical skills with a good problem-solving attitude, experience with analytics tools is a plus
- Ability to perform well and excel in a team environment

Qualification

- BA or BS (MSc preferred) degree in Computer Science, Mathematics, Engineering or related field; equivalent experience considered
- 5-7 years' software development experience with a minimum 2 years' proven work experience as an iOS developer
- Demonstrable portfolio of released iOS apps
