

We are a recognized provider of custom solutions across various verticals, specializing in the online entertainment industry with focus on sports.

We offer turnkey computing solutions, systems support, web development and web-based applications, customized for the specific market needs and demands. Our software solutions gear our partners to gain mileage ahead of their rivals. KenTech's mission is to build cutting-edge applications, which deliver long term commercial benefits and make technology an asset for our clients' business. Our team of trailblazers, innovators, problem solvers and creative minds is seeking a Software Engineer – Test Automation

Software Engineer – Test Automation

If you are looking to develop and execute exploratory and automated tests to ensure product quality and enjoy providing end-to-end solutions to software quality problems, we'd like to meet you. You will play an important part in our company's product development process. Our ideal candidate will be responsible for conducting tests before product launches to ensure the software runs smoothly and meets client needs

Duties and Responsibilities

- Create detailed, comprehensive and well-structured test plans and test cases
- Estimate, prioritize, plan and coordinate testing activities
- Design, develop and execute automation scripts using open source tools
- Perform thorough regression testing when bugs are resolved
- Develop and apply testing processes for new and existing products to meet client needs
- Review system requirements and track quality assurance metrics (e.g. defect densities and open defect counts)
- Liaise with internal teams (e.g. developers and product managers) to identify system requirements

- Monitor debugging process results
- Investigate the causes of non-conforming software and train users to implement solutions
- Track quality assurance metrics, like defect densities and open defect counts
- Stay up-to-date with new testing tools and test strategies

Knowledge and experience

- Five years' experience with at least one scripting language e.g. Java
- Five years' experience with a relational database system e.g. MySQL
- Experience with SQL scripts and database administration
- Experience with designing and developing automation
- Experience with Web Testing, Mobile Automation Testing, Web Services testing using SOAP UI
- Knowledge of DevOps and Agile to utilize automation and run test suites as part of CI environments

Qualification

- Bachelors or higher degree in Computer Science or a related field, or equivalent proven work experience in software development - writing clear, concise and comprehensive test plans and test cases
